Software Assurance Program

Software is essential to enabling the nation's critical infrastructure. To ensure the integrity of that infrastructure, the software that controls and operates it must be reliable and secure.

Security must be "built in" and supported throughout the lifecycle.

Visit <http://BuildSecurityIn.us-cert.gov> to learn more about the practices for developing and delivering software to provide the requisite assurance.

Sign up to become a free subscriber and receive notices of updates.

<http://BuildSecurityIn.us-cert.gov>

The Department of Homeland Security provides the public-private framework for shifting the paradigm from "patch management" to "software assurance."

CROSSTALK is co-sponsored by the following organizations:

Software Engineering Division
Ogden Air Logistics Center
